TO WHOMSOEVER IT MAY CONCERN

After search of two years, going through various different kinds of software made by different big and small companies, we decided to give the entire contract for LIMIS implementation to VISHUAL ACCESS SYSTEMS.

We have lots of apprehensions initially but with every passing day our comfort level increased the software which took a few months to develop ultimately in sheer poetry absolute understanding and implementation of our needs and that of our patients.

This visual access team was not only knowledgeable but also very committed. The software which they had made for us now forms the backbone of our centre.

I personally strongly recommended it to anybody who wants a product of quality.
