Kind attention : Mr Aniruddha Nene (CEO)

Dear Mr Nene,

During last few months when V G S MRI Centre at Escorts Faridabad was being set up, we perceived a pressing need for teleradiology between Faridabad Centre and Organ Imaging and Research Centre, Green Park, Delhi. We were highly recommended your company for this task.

Your team showed to be capable of standing up to the expectations when you successfully installed Sapphire™ mini PACS at both ends. We have started teleradiology in a routine manner between the centres. The transferred images are of perfect diagnostic quality. We appreciate your persistent efforts while our telecommunication infrastructure was not fully functional. Your perception of the local infrastructure while launching the product was apparent when teleradiology worked perfectly even when we switched to the PSTN line as a standby.

The product is an excellent example of user-friendly and intuitive GUI and the work flow is self explanatory. However the training was imparted in a spirit to make the operations completely person independent.

It was a pleasure to note that our expectations for academic archival were exceeded by the product. We could integrate CT (Siemens - AR Star) , 1.5 T MRI (Philips Intera) to archive the data centrally. We can now protect all key images for academic purposes to optimally utilize the on-line archival. Off-line archival in CDs with traceable library is exactly what is required in private centers. We appreciate the autorun CD compiled using Sapphire™ mini PACS that can be used for any of the modalities and is better than most of the patient CDs I have seen.

I strongly endorse Infometry's capabilities in imaging solutions and compliment them for your dedication and customer centric approach.

With best regards,

Dr Parveen Gulati
MD
