

**Jupiter Scan Centre**  
A MRI & CT SCAN FACILITY

27<sup>th</sup> February, 2009

To,

21st Century Health Management Solutions Pvt. Ltd.

Mumbai.

Dear Mr. Neeraj Jain,

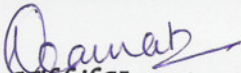

*It gives me a great pleasure in writing this letter after your successful implementation and hand over of the Teleradiology Software Services - 21st Century Nidaan for our CT Scanner. Imaging is state of the art facility adept in Jupiter Scans.*

*My pursuit of excellence in technology and using the same for betterment for medicine has earned me a reputation of not-so-easy-to-satisfy user, yet I have no reservation in acknowledging your solution of meeting our expectations.*

*I was a bit concerned to report to emergency cases at night because, it leaves a common man, with no option, but to rush to the centre or hospital & report to the patient. But, with the advent of Nidaan, Teleradiology Software Services, I can report to the cases anytime, anywhere and most importantly avoid locomoting from my residence to the Centre at the odd hours of the day.*

*The quality of images is splendid for images in compressed mode with the soundest speed of process. I compliment your entire team for well unified work and look forward to aid us in our succeeding enterprises on image dispersion.*

Warm personal regards,

  
Dr. Nikhil Kamat,  
MD, DNB, DMRD,  
Consulting Radiologist,  
Jupiter Imaging, Mumbai
